

Providing Solutions. Delivering Results.

As the leader in Homeland Security Education and Training, Creek Technologies provides innovative information technology (IT) solutions, educational support services, and emergency management services to commercial and federal clients.

CAPABILITIES STATEMENT

Creek Technologies Company (CreekTech) is a Service-Disabled Veteran Owned small business established in 2007 to deliver IT engineering, education, and A&AS services across the DoD and Federal government. Founded upon the Program Management Institute's (PMI) PM Body of Knowledge (PMBOK), our firm's Program Management Office (PMO) has powered successful delivery of complex support-service contracts by incorporating a mature quality management system that include ISO 9001:2015, CMMI-SVC Level 3, ISO/IEC 20000-1:2018, and ISO/IEC 27001. Our PMO employs CreekFlow™, a cloud-based Software-as-a-Service (SaaS) program management system grounded in PMI PMBOK. Our executive leaders are leading experts in their field all of whom have 30+ years of experience and more of demonstrated success in delivering and managing services.

IT Operations/Solution Engineering & Delivery

- ITIL-Based Service Mngmt

Meet InfoSquirrel™ - The Cloud-based Solicitation Management, IDIQ Vehicle Teaming and Proposal Management Platform

InfoSquirrel™ transforms how small businesses operate in a federal contracting environment increasingly dominated by Indefinite Delivery, Indefinite Quantity (IDIQ) vehicles. Supervised Machine Learning (SML) instantly matches subcontractors' capabilities to solicitation requirements, while a Proposal Repository/Generator enables subscribing primes to radically increase the volume and velocity of winning submissions. Visit www.infosquirrel.com for more details.
